DETAILED ACTION

1. The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to **Group Art Unit 1648**.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, drawn to a method for producing an antibody in a host plant using a virus.

Group II, claim(s) 5-7, 9-11 and 12-16, drawn to an antibody.

Group III, claim 8, drawn to a method for producing an antibody in a host plant through transcomplementation of a virus.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: Ma *et al.* (*Eur. J. Immunol.* 1994, Vol. 24, pages 131-138) teaches monoclonal antibodies produced in transgenic tobacco plants which appears to be identical to the antibody of the instant application. In product claims, the method of making holds little weight in patentability when the claimed product and the product of the prior art are identical. Furthermore, the methods of Group I and III differ in that the virus used in the method of Group I is considered to be fully functional and not replication-deficient.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Papers relating to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 located in Crystal Mall 1.
